**Annotated List of Potentially Significant Historic  
Resources - New  
Town of Amherst, NY**

ANNOTATED LIST OF POTENTIALLY SIGNIFICANT HISTORIC RESOURCES - NEW  
TOWN OF AMHERST, NY

Name of Resource/Address	Photo Number	Area (ID Number)	Approx Date of Construction	Resource Type/Description	Resource Type/Description	Potential Threats	Rarity of Resource	Color Code	USN/Determination I (individually eligible), N (not eligible); D (District); U (undetermined); blank (no determination) SHPO NR Listing Number	Documented in Intensive Level Survey, 1998
Alberta Drive Historic District 55 buildings (43 contributing; 7 non-contributing) 10 - 190 Alberta Drive and 11 to 185 Alberta Drive. Includes Temple Sinai	5-1; 5-2; 5-3	Area 5 (5DB1)	1950s	A collection of small, cubic, single-story buildings, approximately one-thousand square-feet in area, and clad in yellow brick. The cubic forms move along the street with a uniform setback, creating a dynamic rhythm, broken only by the change of entrance parts from center to side. A simple, cubic garage is located to the rear. The slightly curved path from the driveway to the street and the utility lines have been buried. The design and layout are standardized. Non-contributing properties are 18, 27, 53, 86, 125, 135, and 185 Alberta Drive.	A collection of small, cubic, single-story buildings, approximately one-thousand square-feet in area, and clad in yellow brick. The cubic forms move along the street with a uniform setback, and broad expanse of lawn, creating a dynamic rhythm, broken only by the change of entrance parts from center to side. A simple, cubic garage is located to the rear. The slightly curved path from the driveway to the street and the utility lines have been buried. There are some trees lining the street and the utility lines have been buried. The design and layout are standardized. Non-contributing properties are 18, 27, 53, 86, 125, 135, and 185 Alberta Drive.			Blue		
Temple Sinai 50 Alberta Drive	5-3	Area 5 (5DB3)	ca. 1955	Post-World War II Synagogue complements the contextual sensibility of the district. The material fabric of the synagogue is the same tan brick, and the formal qualities are cubic, in keeping with the rhythm of the residential structures lining the street.	Post-World War II Synagogue complements the contextual sensibility of the district. The material fabric of the synagogue is the same tan brick, and the formal qualities are cubic, in keeping with the rhythm of the residential structures lining the street.			Blue		
Albion Avenue Historic District 1 to 101 Albion Drive (south side) and 4 to 98 Albion Drive (north side). 41 buildings (39 contributing and 2 non-contributing).	5-4; 5-5	Area 5 (5DB4)	1950s	One-and one-half story cross-gable structures, and single-story, hip-roofed cubic structures with burnt sienna or tan brick cladding. In some instances the side gable is clad in vinyl or wood siding. An octagonal window is located in the facing gable, and a picture window in the wings. The entrance is located at the inner bay of the front-facing gable type. In the cubic structures the entrance is located centrally, or at the outer bay closest to the driveway. There are some newly planted trees lining the street and the utility lines have been buried. Contributing front-gable garages are associated with the cross gable residences and cubic residences. Non-contributing residences are 27 and 40 Albion Drive.	One-and one-half story cross-gable structures, and single-story, hip-roofed cubic structures with burnt sienna or tan brick cladding. In some instances the side gable is clad in vinyl or wood siding. An octagonal window is located in the facing gable, and a picture window in the wings.
