

WILLIAMSVILLE, THURSDAY, OCT. 27, 1892.

LOCAL DEPARTMENT.

Fast Improvement.

Mr. James Chalmers' mare Nellie C. is continuing in her rapid improvement. Last Saturday at the Buffalo Driving Park she made a record of 2.26 $\frac{1}{4}$, winning a match of two out of three heats and the race, with Grant Sherman 2nd and Empire King 3rd. The many friends of Mr. Chalmers congratulate him on the success his fine mare is attaining, as it not only enhances her own value but makes all of her colts standard.

Our Electric Railroad.

As stated in our last issue work is being pushed on our electric road. Commencing the grading and making the road bed at the city line the work has progressed so far that this noon large gangs of men can be seen at work on Fogelsonger's hill, less than a mile from this office.

Hundreds of loads of stone for the road bed have already been drawn from the crusher at work near Fogelsonger's quarries, teams being employed day and night.

Ties and rails have been distributed along the road from the city line this way for quite a distance, and in fact everything is being done to facilitate the building of the road.

We understand the old paper mill has been or will be secured as the power house. This would be an unexcelled location.
