

TOWN OF AMHERST  
 State Environmental Quality Review  
**ENVIRONMENTAL ASSESSMENT FORM**  
 -- **ADDENDUM** --

1. For each applicable category of proposed new structures, including additions to existing structures, provide the following information for all soil types on the project site (*according to Soil Survey of Erie County, NY; Table 11, Building Site Development, pp 294-305*):

Soil Name	Shallow excavations	Dwellings without basements	Dwellings with basements	Small commercial buildings	Local roads and streets
Odessa			Severe		
Cosad loamy fine Sand			Severe		

2. If the Soil survey indicates either "severe" or "moderate" suitability for the proposed types of construction, a geotechnical and hydrological analysis based on one test per 3.5 acres of project area must be provided (per Town Board resolution, 3/17/03, amended 6/16/03).

\_\_\_\_\_ Geotechnical report attached      \_\_\_\_\_ Not applicable

3. Is your property located: On Youngs Road between Dodge and Klein Roads?     Yes  No  
 On Wehrle Dr. between Spindrift Dr. and Oakwood Rd?     Yes  No

*If so, the property may be within an area of the Town that is affected by a moratorium on connections to the sanitary sewer system.*

4. Are there alternative locations on the site for this project?     Yes  No

5. Location and size of real property owned by petitioner within one (1) mile of subject proposal:

    No      
 \_\_\_\_\_  
 \_\_\_\_\_

6. Are you aware of current or future plans or intentions by others in the Town of Amherst to develop property within 1000± ft. of the present project request:     Yes  No

Describe \_\_\_\_\_  
 \_\_\_\_\_

*(Potential environmental impacts from adjacent or nearby projects undergoing the approval process will receive a coordinated environmental review to determine cumulative effects on common receivers (e.g. traffic and drainage corridors) and other relevant environmental concerns.)*

7. Maximum number of vehicular trips to be generated per peak hour upon completion of project     4      
 Source: \_\_\_\_\_

8. Will blasting occur during construction?     Yes  No

9. Does the project propose to connect and be tributary to the public sanitary sewer system?     Yes     No

10. Proposed net additional gallons per day (gpd) of sanitary sewer discharge upon completion of project:  
    600     average flow          2,400     peak flow.

*(Average flows of 2,500 gpd or greater will require an Engineer's Report that includes a detailed downstream sewer capacity analysis and the identification of and commitment to required I/I offset work during peak wastewater flow conditions.)*

11. Based on the Town's 2011 Reconnaissance Level Survey of Historic Resources, is your property 'blue-rated' for historic significance?     Yes  No
