

Reclaim Your Freedom

Have you ever thought about what would happen if the transportation you use was no longer available? How would you continue to maintain your independence so that you could continue with your daily routines? Who would you turn to for assistance? People often look to friends or relatives to assist with transportation – this may be a good option for you, but it is not always the most convenient for you or for them. Thinking ahead to alternative transportation options can give you peace of mind should your current means of getting around in your community change in the future. Lack of affordable and accessible transportation is increasingly identified as one of the major problems and service needs of older adults. Amherst Senior Transportation Services has made it a priority to enable seniors to stay in their homes as long as possible by providing an affordable, accessible, and adaptable solution to meet both current and future mobility needs and maintain independence.
